### DETAILED ACTION

Claims 1-24 are pending.

#### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a method of reducing neoplastic cell ex vivo by contacting mixture of normal hematopoietic cells with neoplastic cell, classified in class 435, subclass 235.1.
- II. Claims 22-24, drawn to a method of treating cancer ex vivo comprising contacting the mixture of neoplastic cells and bone marrow cells with an RNA virus plus amyoloabltic treatment, classified in class 424, subclass 93.1.

Upon election group I, a further restriction is required under 35 U.S.C. 121:

- A. The RNA virus is a single stranded RNA virus.
- B. The RNA virus is a double stranded RNA virus.

Upon election group A, a further restriction is required under 35 U.S.C. 121:

- i. The single stranded RNA virus is a rhabdovirus.
- ii. The single stranded RNA virus is a paramyxovirus.
- iii. The single stranded RNA virus is a Sindbis virus.

2. Claim 2 link(s) inventions of group A and Group B, The restriction requirement of groups A and B when the linked inventions is subject to the nonallowance of the linking claim(s), claim 2. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Claim 6 link(s) inventions of groups i-ii and iii. The restriction requirement of groups i to iii when the linked inventions is subject to the nonallowance of the linking claim(s), claim 6. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**The inventions are distinct, each from the other because of the following reasons:**

Inventions of groups of i to iii are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different methods by using structurally and functionally different viruses and that they are not disclosed as capable of use together, e.g. the method of Group i uses rhabdovirus, whereas the method of the group ii uses paramyxovirus.

Inventions of groups of A to B are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different methods by using structurally and functionally different viruses and that they are not disclosed as capable of use together, e.g. the method of Group A uses a single stranded RNA virus, whereas the method of the group ii uses double stranded virus.

Inventions of groups of I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different methods comprising different

procedures by using different agents, e.g. the method of Group I uses virus with inhibiting virus agent, whereas the method of the group II use virus plus cell activation agent.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
